#### Normalization 1

### Part I

1. I would tell Mr. Merservy that he did a good job organizing the data, then think to myself about all the mistakes I'll need to fix.

#### 2.

| PackageID | Tag Number | Install Date | SoftwareCostUSD |
|-----------|------------|--------------|-----------------|
| AC01      | 32808      | 09-13-2005   | 754.95          |
| DB32      | 32808      | 12-03-2005   | 380.00          |
| DB32      | 37691      | 06-15-2005   | 380.00          |
| DB33      | 57772      | 05-27-2005   | 412.77          |
| WP08      | 32808      | 01-12-2006   | 185.00          |
| WP08      | 37691      | 06-15-2005   | 227.50          |
| WP08      | 57222      | 05-27-2005   | 170.24          |
| WP09      | 59836      | 10-30-2005   | 35.00           |
| WP09      | 77740      | 05-27-2005   | 35.00           |

<sup>3.</sup> The primary key is composed of the columns PackageID, TagNumber, and Install Date. The reason for this is because the install date also affects the price of the Software.

# Part II

## 4.

| PackageID | TagNumber | InstallDate | PCModel     | SoftwareName | SoftwareCostUSD |
|-----------|-----------|-------------|-------------|--------------|-----------------|
| AC01      | 32808     | 09-13-2005  | Apple       | Unity        | 754.95          |
| DB32      | 32808     | 12-03-2005  | Apple       | Unreal       | 380.00          |
| DB32      | 37691     | 06-15-2005  | Windows     | Unreal       | 380.00          |
| DB33      | 57772     | 05-27-2005  | IBM         | RPG Maker    | 412.77          |
| WP08      | 32808     | 01-12-2005  | Apple       | GameSalad    | 185.00          |
| WP08      | 37691     | 06-15-2005  | Windows     | GameSalad    | 227.50          |
| WP08      | 57222     | 05-27-2005  | Ouya        | GameSalad    | 170.24          |
| WP09      | 59836     | 10-30-2005  | OpenSource  | GameMaker    | 35.00           |
| WP09      | 77740     | 05-27-2005  | PlayStation | GameMaker    | 35.00           |

- 5. PCModel is affected by just the TagNumber, SoftwareName is affected by PackageID, SoftwareCostUSD is affected by PackageID, TagNumber, and InstallDate.
- 6. The reason for the table not being in the 3<sup>rd</sup> Normal Form is that some of the columns in the table only have partial dependencies, where some columns are not affected by every row in the primary key.

7. Software Table – Primary key PackageID

Console Table – Primary key TagNumber

Install Table – Primary Key TagNumber, PackageID, and InstallDate

- 8. In the Software table, PackageID affects SoftwareName. In the Console Table, TagNumber affects PCModel. In the Install Table, SoftwareCostUSD is affected by the PackageID, TagNumber, and InstallDate.
- 9. The tables now follow all the rules to be in the third normal form. The columns that aren't part of a primary key are only affected by the columns that make up the primary key. The relations between columns are either 1 to 1 or Many to 1, so the table follows all the rules.
- 10. Check the other file.
